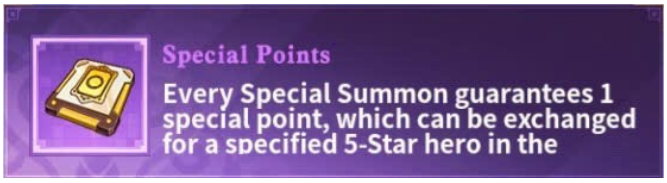
# CHARACTER SPOTLIGHT & INDEPTH REVIEW:

- Name: **Uchiha Madara**
- Rarity: **Blazing (Limited)**
- Elemental: **Chaos**
- Hero type: **Hyper Carry Fixed DMG Dealer Mage**
- How to obtain: **Chaos Summon Card Optional Chaos Shards**

1. Using **Chaos Summon Card** to pull for Madara's Shards then combine 100 shards into 1 Madara copy.

2. Using **90 Special Points (NA/ EU)** or **70 Special Points (TW/ Rumble)** to exchange for 100 Madara shards during Madara's limited-time banner event.



3. Using **Optional Chaos Hero Shards** to exchange for Madara shards.

# BASIC HERO'S KIT – HERO'S SKILL SET

1. *From Left to Right is:*
    1. **Ultimate:** Heroes can perform this skill when their Rage fully regenerated.
    2. **Technique:** Heroes can perform this skill after 4 normal attacks.
    3. **Passive 1:** Usually describe hero's core passive skills.
    4. **Passive 2:** Usually describe heros extra passive skills.
    5. **Passive 3:** Bonus stats when reached required Ascension Tier and Aura skill.

2. ***Indepth Review:***
    1. **Ultimate:**
        - Deal decent amount of DMG to all enemies with knock-up to interrupt some heroes skills.
        - Can deal decent amount of Fixed DMG and can pair with Saitama & Kurisu to boost his Fixed DMG up with Bonus Fixed DMG. But this is not Madara's core power.
        - Gives 1 Passive stack every time using ultimate.
    2. **Technique:**
        - Powerful AoE skill with skill range is a row of 3.
        - Cannot be interrupt while casting.
        - Gives bonus DMG to Ultimate.
        - One of Madara's main DMG resources.
    3. **Passives:**
        - Give Shield and can renew whenever receive Mangekyo Sharingan stacks for more survivalbility.
        - Give decent bonus DMG when carried full stacks to both Madara and your sub DMG dealer. A powerful offensive buffs.
        - Heal a lot when first activate Passive 1's healing and Passive 2's invincible status make Madara is harder to execute and also give him space to deal massive DMG return to enemies while being Invincible.

- Gives immunity to knock-up and knock-back to 1 sub DMG dealer in team for 40s will help that unit approach some annoying hero like Mina – Muzan – Shadow -… easier.
- Susanoo can be activated even when Madara received crowd control effects. Susanoo trigger is uninterruptable, cannot be cancel and work separate from Madara's attack and skill casting animation. Turn Madara into a very reliable Hybrid DMG dealer by doing AoE skills DMG and Susanoo's great single target DMG at the same time.
- Mixed DMG between Normal DMG and Fixed DMG create very sticky situation for squishy targets. Because lack of defensive buff to endure those amount of DMG.

4. **Exclusive Weapon:**
    - Focusing on overall DMG Buff, very straight forward to boost your main DMG dealer output DMG.
    - Give another ability to gain more passive stacks when ally casting Ultimate.
    - Prevent Unyielding is very handy to bully some character.

## *OPTIMIZING HERO'S PLAYSTYLE:*

***Madara overall DMG is from his ATK stat: The more ATK you have, the more massive he becomes. And because he needs a lot of investment to gears, equipments,… and while he can deal mixed normal DMG & Fixed DMG + He can also deal burst & DPS DMG at the same time with his kit. Madara is a P2W Hyper Carry unit for PvP in my opinion.***

1. **Noble Phantasm:** The moment you choose to stick him with any Noble Phantasm below, you will need to follow very specific builds of Soul Jade – Cloth – Allies to maximized his potential.
   **P2W: Prelati's Speelbook & Crimson Lotus Saintress.**
   **F2P: Noname dagger > Rule Breaker > Sword of Rupture.**
    - **Fully Nuke buid:**
        - Crimson Lotus Saintress and full crit build. This will help you boost his Output Fixed DMG to the highest but you will need to run a full Ult Spamming comp which is

countered very easily by crowd control effects abusers or Technique abusers comp.

- **High DPS build:**
    - Prelati's Spellbook gives high bonus ATK stats which benefits all Ultimate – Technique – Susanoo overall output DMG. Also the ability to spam Technique skill constantly (that skill damage is AoE dmg and very huge by the way) will help him lower enemies HP fast so Susanoo can Execute low HP targets. Because Susanoo can retargeting after each hit, you can execute enemies very fast with Fixed DMG from Susanoo. Plus: Susano'o's Fixed DMG is count as Technique's Fixed DMG so Prelati's Spellbook is a must!
    - Noname Dagger gives huge Bonus Skill DMG when carrier's HP dropped <35%. And because Madara can heal up very fast with his passives, you can enjoy Madara doing maximum Output DMG during NP's passive duration. And the NP also gives decent amount of additional DMG when casting Ultimate and Technique so it is not a bad choice if you don't have Prelati's Spellbook but having a high ascension tier Madara (E2 or above).
- **F2P build:**
    - Rule Breaker gives bonus ATK stats after perform Ultimate, it is a very straight forward tool to boost Madara's overall output DMG and require a team to regenerate Rage fast to help him spam for more DMG boost. And get countered pretty easy when facing any lineup has Mai + Prelati's Spellbook (the gay Rage Reduction build).
    - Sword of Rupture gives decent additional DMG and Rage reduction ability so you can change Madara into a Gemini Cloth user if you want him become a gay mage but I will not recommend anyone using

that build because it only effective at E4 with enhance Gemini + Silence from Soul.

2. **Soul Jade:** I will tell you the core ones and optional ones.
   **Core:** Shapeless – Silence.
   **Optional offensive:** Strength > Blade > Swift > Penetration.
   **Optional defensive:** Tenacity > Dodge > Lifesteal.

Madara's DMG relies mostly on his Technique & Susano plus you will need to stack many buff to boost his DMG further beyond. And mixed DMG with a skill-type Mage like him will not need Penetration or Armor Break that much because Fixed DMG is… fixed by Madaras ATK stat and cannot be reduced by DEF or normal DMG Reduction buff or DMG & Crit DMG Reduction debuff. So those SJ above is the most optimized for Madara in my opinion.

3. **Cloth:** A Hyper carry like Madara will need time to build up his output DMG so I will not recommend Saggit Cloth if you are not a gigawhale.

**Taurus** > **Sagittarius** > **Cancer** > **Gemini** > **Leo** > **Pisces/ Capricorn** > **Aries**.

- If you are aiming for the most effective way to maintain Madara's output DMG, Taurus is the key for early survivalbility and bonus DMG later on.
- Sagitt if you are using Spellbook/ Noname and pretty confident with your nuke DMG.
- Cancer is for Lotus build only.
- Leo now can deal % Max HP DMG by casting both Ultimate and Technique, also the CD is reduced from 5s to 3s so it is easier to use now.
- Gemini if you are not confident to use Madara as main dmg dealer due to lack of bonus passive stats, low ascension tier,…
- Pisces – Capricorn – Aries when you only use Madara for 3rd team and didn't have any stronger cloth set for him.

4. **Allies:** I will tell you the core ones and optional ones just like Soul Jade.
   **Core:** Saitama - Mai - Shadow - Kurisu/ Sebastian in AST Slot.
   **Optional:** Mina - Rem - Lux - CC – Inori.

Saitama gives 2 highest ATK allies Fixed DMG boost, heal them a lot, easy to understand.

Mai with Prelati's Spellbook is gay and very hard to counter at the moment.

Shadow is annoying – tanky – gives allies soul armor and a little bonus DMG a very needed unit if you don't have Mai.

Kurisu when you are confident in your team's winrate because she gives very straight forward Bonus Fixed DMG and Fixed DMG Reduction with her AST Skill.

Sebastian when you need more survivalbility (he provide lots of Dodge stats to help you nullify incoming DMG)

Rem & Lux – I don't think I need to explain about this.

Mina + Inori is for TG Madara only.

CC is for dumbass full crit build with Crimson Lotus Saintress.

# Tengai Shinsei
