Gear: Level Up & Refine

Fishing Gear to Level Up
Our main focus will be on the fishing line and fishing float.

Our sub focus would be the fishing rod itself.

The line and float are the main factor determine on whether your fish escape or fish line broke.

The fishing rod itself is where you sell fish and sell of the drops for more sea shell to upgrade your aquarium.

Gear Refine
If we pay close attention towards upgrading our fishing line/floats/rod, there's a refine option.

In the refine option we would need to hunt for the rare stats vitality, cleaner and aquarist.

The higher your rod upgraded the better the refinement stats you will be getting for those rare stats.

If you're wondering what those stats do please read it in game or the screenshot attached below.
