DPS- Assassin & Mage

DPS - Assassin & Mage Soul Jade Tier List
Assassin & Mage are mainly running either Shapeless + Taurus(Gold Cloth) or Enrage + Sagittarius(Gold Cloth). The common soul that they share are Swift, Strength & Penetration.

Silence & Armor Breaker are mainly use for debuffing.

Blade mainly use for unit that ULT a lot like Sukuna, Gojo, etc.

Crit is a debatable soul as if your running a high crit unit with Crimson NP you might want to use Crit Soul, but overall if your crit is about 50% without Crit Soul I do say you can bring another soul that buffs dmg, as you will still crit eventually, it really depends on what you need.

Penetration & Precision, both soul jade are good for dps, overall penetration is used more than precision due to penetration provide better value in general, precision will have more value if your fighting someone with dodge soul jade on all their support+warrior unit.

Starting from Tier B to C, the soul are mainly your sub option, testing different build + soul, not really recommend for main lineup unless your cooking a new comp with it.
