# Energy Supply Station

**Energy Supply Station**

The Energy Supply Station is a feature of Wonderland Exploration.

In this system, players can create up to two cars simultaneously.
These cars are used to farm Crystals through the “Set Out to Explore” activity.

Each car can host:
- 4 players
- 1 captain

Car Duration

Players can use Energy Stones to increase the duration of a car.

The duration can range from:
- Minimum: 2 hours
- Maximum: 24 hours

The longer the duration, the higher the Crystal production, but it will also require more Energy Stones to create the car.

Energy Stone cost per car:
- Minimum: 1 Energy Stone
- Maximum: 12 Energy Stones

Crystal Farming Formula

The amount of Crystals obtained is calculated with the following formula:

Base Resources × (1 + Captain PWR Bonus) × (1 + Captain Title Bonus)

Where:
- Base Resources: 100
- Captain PWR Bonus: depends on the captain’s power and is expressed as a percentage
- Captain Title Bonus: depends on the titles owned by the captain

There are three possible title bonuses:

- 20%
- 40%
- 60%

Captain Bonus

The captain receives double the materials obtained from the car
