

Fishing

Fishing

Fishing is the best way for you to obtain stats.

So how do we maximize fishing?

First off we need to understand that we will be getting 90 breads per fishing day, and our max breads we can save are 180, the fishing order mission says if you fish 200 times, it will automatically help you to complete the quest no matter what progression your on.

Knowing that information, we first have to save 180 days on 2 fishing days, use 30 bread so that you will be on 150 breads before the end of the day.

On the third fishing day of the week, you will first obtain 30 breads, which put you on 180, start refreshing the fishing order to hard quests like 4 to 5 star quest, as of now they fix the bug where you won't be able to refresh for easy quest and repeat it, so just refresh for 4 to 5 star quest. Upon finishing the 180 breads, we will get another 60 more breads here's where you need to pay attention, fish 19 bread so our total goes to 199, and stop fishing, make sure that your fishing order are 4-5star, and fish 1 time and boom it will automatically complete all those hard quest orders so that you can maximize the rewards earn.
