

Gemini & Jp

__&J Gemini Set__

Set Bonus

2 pieces

- ATK +12%

4 pieces — Skill: Pollux

When you apply a control effect, the following happens:

The target loses 300 additional Rage

& p Limitation:

- The same target can trigger this effect only once every 10 seconds

__Which effects count as Control__

The game considers these as control effects:

- Stun
- Immobilize
- Taunt
- Binding
- Silence
- Deterrence
- Blockade

So any hero that applies these effects can activate the set.

__What losing 300 Rage means__

Rage is essentially the energy used to cast the Ultimate.

So this set is used to:

'L delay enemy ultimates

If an enemy:

- gets controlled
- loses 300 Rage

it becomes much harder for them to cast their skill.

___Real function of the set___

This is an anti-ultimate set.

It helps to:

- slow down skill rotations
- break enemy combos
- control the pace of the fight

It is more strategic than many other sets.

___Best heroes for this set___

It only works on heroes with control abilities.

___Ideal for___

Controllers Heroes that apply:

- stun
- silence (Can be trigger by soul jade)
- immobilize
- taunt

___Not useful for___

'L Pure DPS

'L Healers

'L Supports without control

Because they would never trigger the set effect
