Tierlist NP

Based on Frieren Kit, she's a heavy debuffer and rage reducer. With that in mind we can push her Rage Reduction ability to the max with Sword of Rupture for a debuff build.

An alternative build would be a high CRIT Frieren, but the downside of this build is that Frieren can't compete with a High Crit invest Rimuru or Makima as both units have CRIT increased in their kit.

Best: Sword of Rupture

Sub: Crimson Lotus Saintress

Niche: Primeval Flame/Rule Breaker

Sword of Rupture as mentioned is best for a debuff Frieren, paired with Silence Soul Jade to abuse her Rage Reduction with her kit.

Crimson high invest Crit build, but hard to build, sub option

Flame and Rule are niche option when no NP to use

Soul Jades Per Role

Silence+Shapeless+Tenacity+Strength

Silence+Shapeless+Strength+Penetration

Shapeless+Crit+Strength+Penetration

Frieren rely mostly on her debuff in Kit, also her Ultimate DMG, for most player Frieren are consider to be a 2nd DPS on team, she's a heavy debuffer, building her to survive and continuously providing debuff is the key to play

Cloth Tier List

Best: Taurus & Gemini

Taurus is pretty much the all rounder for Frieren, survivability and DMG

Gemini Frieren is abusing her Rage Reduction to the max, pair with Silence Soul Jade

Best Team

Knowing Frieren playstyle, is hard for her to act as a Solo DPS, she pairs well in Stall Team, and other Duo DPS team that can Stall

Stall Team:

Shadow+Saitama+Rem+Lux+Kurusu

New Stall:
Asta+Saitama+Rem+Lux+Kurusu

Duo DPS:
Saitama+Rem+Lux+Burst/Stall DPS+Kurusu

The recommended play here are pretty much Stall Team/New Stall, but there's always a better option yet to be discovered, Duo DPS team often harder to run, as current Meta most player are running a Burst Stall, in order for Frieren to survive she needs a full stall to maximize her potential.

With that, in a stall team Shadow/Asta is a must to run as an off-tank unit, shifting to a DPS build in helping out DPS.
